

SMART-JET DL200

THERMAL INKJET CODER

Create print packaging codes based on the unique information in your databases.

Introducing the Smart-Jet DL 200 thermal ink jet coder. Designed for use on your conveyor line, this technology offers superior reliability as well as a wide range of advantages for your packaging printing. It easily turns the variable information in your databases into unique printed identification numbers, production counts and even bar codes up to 1". In addition, this coder is simple to use since it is run through a web browser, eliminating the need to download a driver or program.

Contact your distributor to order or to see the full line of superior quality MSSC products.
